Herdsman: Bryan Leapaldt • 701-466-2553 • 701-739-8764 Cell

Welcome to the 25th Anniversary Sale!

It's been 25 years since we had our first public auction sale! We sold private treaty prior to that. This year also marks the 25th year of employment for our herdsman, Bryan Leapaldt! We are lucky to have him on our team. He and his family are part of our family and we appreciate all they do.

A lot has changed in the last 25 years. In that time frame, we went from 200 cows to 450 cows, we downsized the cattle from the 90's, we took all the white off and we added SimAngus and Red Angus. In order for Simmental to stay relevant in the cattle industry, it definitely needed to change directions from where we were going in the 90's.

It's always important to honestly evaluate your relevance and sometimes make those hard decisions to change. We believe in order to be relevant right now, we need to have performance in our cattle along with carcass & maternal values, but we also believe we need to have balance.

We understand in order to keep a ranch going, one needs to be profitable. In order to be profitable, the cows need

to stay in your herd for the long haul and they need to have a calf each year. Calves need to wean heavy and gain, yet they also need to grade so customers want them again. In order to keep cows in

the herd, they need to have good structure, good udders, good dispositions and be able to raise a good calf. We keep all of that in mind in our breeding program. We pay close attention to EPDs, but we also factor in structure, udder quality, foot quality and disposition. We may increase our API slower than some, but we are not giving up these important phenotypic traits to get there.

You'll find a few calving ease prospects in our offering this year, but you'll also find many top-notch performance bulls. We feel if a commercial producer has Angus cows, the marbling is already there. By using Simmental bulls they will add heterosis, muscling and ribeye. We factor that in when we make our SimAngus as well.

Unfortunately, due to Covid, we will not be able to hold our social after the sale this year. We look forward to being back to normal next year. We will miss socializing with our customers, so we hope many of you can make it before the sale in order to visit more one-on-one ahead of time. We are also offering a chance to win a \$500 credit on the 2021 sale for anyone who comes prior to sale day. Everything else on sale day will be the same as always, except that we'll have hand sanitizer available everywhere!

We can't wait to see everyone on February 13, or before, at the ranch!

Sincerely,
The Kenner Team

Tyler Lannoy
and Erika Kenner

Roger and Jeanette Kenner and grandkids

ANNOUNCEMENTS

Announcements made sale day, and from the auction block during the sale, take precedence over printed material associated with this sale. Anyone attending this sale attends at their own risk. Breeders or any of the sale staff will not be held responsible for any personal injury while attending this sale.

AIRPORT

Devils Lake Regional Airport (DVL) is served by United to Denver and has excellent facilities for light aircraft.

Leeds (D31), Maddock (6D3) and Rugby (KRUG) have airports for light aircraft. Check runway conditions before landing.

EPDS

BOLT EPDs pulled 12/29/2020. All the bulls have been LD-tested (and parent verified) and have the genomics incorporated in the EPDs in this catalog unless they are noted otherwise. All will have genomics by sale day.

HERD HEALTH & DATA TEAM

Herd Veterinarian, Dr. Judy Gibbens, Gibbens Vet Service, Cando, ND
Pregnancy Ultrasound, Dr. JJ Hovde, High Plains Vet Service, Sydney, MT
Carcass Ultrasound, Jason McLennan, Inc., St. Onge, SD

PERFORMANCE DATA

Complete ultrasound data will be available before the sale by logging on to www.kennersimmental.com. Data will also be available on sale day.

VIDEOS

Videos of the bulls will be available on our website in the middle of January. Log on to www.kennersimmental.com.

SALE FORMAT

The cattle will sell by video on sale day. All the bulls and heifers will be penned next to the sale barn by 9 am on sale day and will stay in those pens throughout the sale.

TRUCKING

We will try to deliver the bulls to the buyer's farm, or we will assist buyers in coordinating loads and make the most economical trucking arrangements possible. All the bred heifers must be picked up on sale day or have trucking arrangements made soon after since they will be close to calving. For assistance with trucking arrangements, contact Erika.

INSURANCE

We can keep the bulls at home for no charge until April 1, but we recommend purchasing insurance.

For more information contact: Erika Kenner, 406-581-1188

TERMS & CONDITIONS

- We guarantee all bulls to be breeders and we reserve the right to test any bull in question as a non-breeder for a reasonable amount of time before making an adjustment. And, if the bull is declared a sound breeder by a competent veterinarian, he will be returned to the buyer. In case an adjustment is required, it will be made with a replacement of equal value to animal in question, credit on purchase of another animal, or return of purchase price.
- Each animal becomes property and therefore is also the risk of the purchaser after it is sold. We guarantee the cattle to be healthy sale day.
- For those who cannot attend the sale, we will honor a telephone order and guarantee your phone purchase to meet your request when inspected personally by you.
- Certificates of registry will be supplied by the seller.
- All cattle sell under terms and conditions of the American Simmental Association and will be available in the office on sale day by request.
- We reserve the right to collect 100 units of semen on any bull in the sale for in-herd use only. The collection would be at our expense and buyer's convenience. Each bull will sell to the buyer with 100% ownership opportunity.

Can't make it? Watch and bid online through DVAuction.

Log on to www.dvauction.com and register for the sale. You must be approved prior to the sale, so please register early.

Catalog designed by

KENNER SIMMENTAL RANCH

Understanding the Data

WHY USE EPDS?

We have included all the data we can for each animal in this catalog, but we strongly recommend using the EPDs the most. EPDs allow a buyer to compare the animals across the breed. If you look at the actual data of an animal, it only tells you how they compare in that particular herd. By using the EPDs, you can compare them across herds and within herds more accurately.

We've formatted our lot boxes to include the percentile ranking for each trait if they rank within the top 50% of the breed. This will make it easier to evaluate each animal.

CALVING EASE EPD

Please understand the CE EPD is actually **heifer** calving ease. This number tells you how those bulls will calve on heifers - % unassisted compared to the other bulls on heifers. For example: If Bull A has a CE EPD of 10 and Bull B has a CE EPD of 5, Bull A will have 5% more unassisted births than Bull B when used on heifers. If you are going to use the bull for cows, you do not need to have that number as high.

GENOMIC EPDS

There are several genomic tests available. The new LD test is 150K SNPs and is accepted for AI sires and donor cows now. The results are incorporated in to the EPDs through the single-step system (BOLT) and increases the accuracy for each trait.

All the bulls in the offering have been LD tested with the new LD test and the resulting EPDs are in the catalog. If any bulls will be used in an AI program, they are already qualified as an AI sire.

DILUTION GENE (DL)

All the red animals in this sale are non-diluted (DLF). DLF means they are free of the dilution gene. Grey calves will not result from any of these animals when bred to black animals.

OH/RC GENETIC TRAITS

OH or Oculocutaneous Hypopigmentation is a cosmetic genetic trait affecting Simmental cattle. It is a recessive trait so it is only possible from the mating of two carriers. It is non-lethal and doesn't affect performance of the animal, but the animals will have "white-colored" eyes and/or a diluted hair coat. The most popular recent ancestor that is the carrier is PVF-BF BF26 Black Joker. We have tested everything in our herd that could possibly be a carrier and have identified the ones in this sale as either **OHF (Free)** or **OHC (Carrier)**.

OHC means that animal carries the gene. If mated with other carriers, there is a possibility to see the trait. If not mated to carriers, you will not see the trait, but may pass the carrier gene to some of the progeny.

RC is the Red Charlie gene. This gene is responsible for passing along the red gene even though an animal would test homozygous black. The test results are masked and have to be tested further if a potential carrier. If the animal results as homozygous black, but a RC carrier, then they are actually heterozygous black. We have tested any bulls that could be potential carriers and have identified them in the catalog. You'll see **RCc for carrier** or **RCF for free**.

DD GENETIC CONDITION

Developmental Duplication (DD) is a genetic condition where the affected calves frequently develop extra body parts (often limbs), a condition called polyelia. This is a non-lethal, recessive trait, so the animal needs to have both genes for it to show signs. If you have a carrier (DDC), you do not want to mate that animal to another carrier animal.

HERD HEALTH

BULL VACCINATIONS

Calfhood: Bovilis Coronavirus

Pre-turnout: 7-Way, Inforce 3 and Bovilis Coronavirus

Pre-weaning: 7-way, Bovilis Coronavirus and Pyramid 5+ Presponse

Weaning: Inforce 3 and Dectomax Injectable

30-day Post-Weaning: Bovishield Gold 5 and 7-way

January: Poured with Cleanup II

BRED HEIFER VACCINATIONS

Pre-breeding: Bovishield Gold VL5 HB, Boosted with Bovishield Gold VL5 HB

November: Scour Bos 9 and Type A Clostridia

January: Scour Bos 4, Type A Clostridia, Wormed with Safeguard and Poured with Cleanup II

The bulls were fed a TMR ration formulated by Tyler Melroe of Hubbard Feeds. Our ration is formulated on a moderate level of energy that's appropriate for the genetic type and the northern environment just as our feeder cattle are fed. Our trace mineral program is designed to improve structural integrity, foot quality and immune function. They are on a high-end supplement program. Our average ADG for the 2021 sale bulls ADG was 3.73 on a 105-day test.

BVD AND JOHNE'S STATUS

All animals in the herd tested negative for BVD. We have maintained our Johne's Status and have not had any test positive.

Can't make the sale? Watch & bid online for **FREE** at www.dvauction.com !

DVAuction
Broadcasting Real-Time Auctions

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

3/4 SM 1/4 AN

Freightliner is definitely a power bull! You'll be very impressed with this sire group! We only sampled him in our AI program, so we just have a few, but they are good. His daughters in the replacement pen are also impressive. They have muscle shape, thickness, great depth, and still have style. These calves have great dispositions! Sons sell as Lots 1-4

Lot 1

BLACK PUREBRED BULLS

HOOK'S BLUEPRINT 13B

HOOK'S BLUEPRINT 13B

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

We've had bulls by Blueprint in the past couple sales. This year, we only have sons by him & our new donor, X80. This is a great combination as they both fill in the gaps of each other. Blueprint excels in growth and REA, whereas X80 excels in maternal and marbling. They are packed full of performance and look amazing. All the progeny in this mating are also super docile. Sons are Lots 14-17.

KS SHERYL X80

HETEROZYGOUS BLACK / HOMOZYGOUS POLLED

Not sure why we waited so long to flush this cow! Every bull she had naturally made the sale and sold well and one of her daughters was a high-selling heifer in our sale a few years ago going to Canada. It's no surprise though, she's a daughter of our old donor, KS Demmi. Unfortunately, we didn't get a photo of her before we had to put her down. She injured her hip this past year. She was a big-volume cow with an excellent udder and a sweet disposition. She has progeny by Hook's Blueprint and Colorado in this sale. Sons are Lots 13-19.

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

We used Big Timber for his calving ease, so he was mainly used on heifers and high-performance cows. We really like his calves. For being a calving ease sire, his sons are still proving to be high performing. We've been impressed with them since birth. They have a great look to them and have been some of the quietest, most docile bulls in the pen. Sons sell as Lots 24-28.

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

Cowboy Cut sons have been loved by everyone at our sale the past few years. We only have 2 this year as we also used 2 sons of Cowboy Cut – Woll Class Act & TJ Franchise. Cowboy Cut calves have a tremendous look to them. They calve easy, grow, excel in carcass value and have super dispositions. His daughters are easy keeping, beautiful uddered, docile cows that will be your top cows. Sons sell as Lots 46-47 & grandsons sell as lots 44-45 & 48-61. His daughters sell as Lots 134-137.

DOUBLE J X011

DOUBLE J X011

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

X011 should not be a stranger to anyone. For the past several years, there have been many bulls in the sale by her and several different sires. All of her matings click! This year, we only have one mating by her – TJ Franchise, but these calves are impressive! X011 stamps her calves with so much length, depth and muscle shape and gives them an unbelievable disposition. They are easy to be around and to admire. Sons sell as Lots 48-51.

TJ FRANCHISE 451D

TJ FRANCHISE 451D

HOMOZYGOUS BLACK / HOMOZYGOUS POLLED

1/2 SM 1/2 AN

We loved our Franchise calves last year and I think these might even be better! He is a Cowboy Cut son that is an ABS bull, raised by Triangle J Ranch in Nebraska, and like the Cowboy Cuts, I think the females will also be super. We used him primarily on our larger framed cows. We also used him on heifers as he calves easy. His calves have so much style & eye appeal with a great amount of thickness and muscle shape. Their disposition is also excellent. Sons sell as Lots 48-61.

• Dam is an ET daughter of the Kayla donor. The Kayla line has added many nice females to our herd.

POSS ACHIEVEMENT

PB ANGUS

Achievement is an ABS bull that we used for the first time on our heifers and high-performance cows. He combines calving ease, performance and carcass value and adds a little more frame. His calves have all been docile and look great! Achievement is known to have excellent foot structure and that was also important to us. Sons sell as Lots 62-66.

PB ANGUS

Powerpoint was raised by Spickler Angus Ranch of Glenfield, ND and sold to Ellingson Angus & ST Genetics and we used him in our AI program on heifers. His sons have sold super well the last couple years and rightfully so. They calve easy, but grow and have so much eye-appeal and sound structure. Disposition is excellent. We also have a calf by a son - S Powerpoint 843 - who we purchased from Spickler Angus South. Sons sell as Lots 68-69 and his grandson is lot 67.

• Purchased dam from G&D Simmentals, Calvin, ND.

Erika finished up her 6 years on the ASA Board last January at the ASA Annual Board Meeting in Denver. She received her Swiss Bell that all retiring Board members receive.

Erika & Tyler got to spend some time in the Montana mountains on horseback again last summer. Was one of the safest places to be this past year!

KS PENNY X395

KS PENNY X395

NON-DILUTED RED / HOMOZYGOUS POLLED

X395 clicks with absolutely everything! She's had 121 progeny by ShamWow, Bases Loaded, Rebel, Hard Drive, Ambition, Red Mountain, Daytona, Major Move, Newton, Brown Redemption, Little John, Intrigue & Commotion and they've all been standouts. She's also the mother of the Zada cow that Doug Bichler owns and is in his donor program. You'll see many full sisters to Zada have bulls in this sale. X395 has a beautiful udder and consistently puts performance, good structure, and great dispositions into her progeny. This year we have sons by her from many different sires – so take your pick! Sons sell as lots 81-85 & 113-116.

KWA FLYF RED MOUNTAIN 16Z

NON-DILUTED RED / HOMOZYGOUS POLLED

We still had a few embryos in the tank by Red Mountain and X395, so there are only 2 sons in this year's sale by him, but they are impressive. These will be the last Red Mountain sons ever sold here. Red Mountain semen is not sold in the US. The combination between him and the Penny cow make powerful bulls with a ton of rib and hind quarter, excellent structure and super dispositions.

KS LITTLE JOHN C85

KS LITTLE JOHN C85

NON-DILUTED RED / HOMOZYGOUS POLLED

Little John sold in our 2016 sale to Mike Traxinger, SD, the same year Robin Hood sold. They were both Red Mountain sons, but Little John is a calving ease bull who works on heifers. We used him in our AI program on heifers and high performing cows. The muscle pattern follows more of a calving ease look, but they are sound and functional and still grow! You'll find some females by him in the bred heifer section too. Semen on KS Little John is available through Traxinger Simmentals, Houghton, SD. Sons sell as Lots 90-92.

Newton was one of the Commotion sons that sold in our 2017 sale to Dan Birkeland from Sheyenne, ND. After a couple years, we purchased him back from Dan. He got hurt at the end of breeding this year and we had to sell him. This Spring will be his last natural calf crop. We used Newton on heifers and high performing cows. Besides a great phenotype, he also fixes a lot of maternal calving ease issues and his calves are super docile. Sons sell as Lots 107-111.

Red SimAngus Bulls

WFL MERLIN 018A

PB RED ANGUS / HOMOZYGOUS POLLED

We had heard great things about Merlin from breeders who had used him, so we added him to our AI program. You'll find some 1/2 SimAngus bulls by him and some Purebred Red Angus and they are nice. For a calving ease sire, he still ranks in the top 25% for growth. The sons and daughters have incredible depth of body and seem to have good feet. Dispositions are excellent.

PUREBRED RED ANGUS

We have focused our Red Angus program around calving ease and carcass traits, but we are selective on udder quality, disposition and feet as well. We have six yearlings to offer this year and three 2-year-olds. The yearlings are mainly by Merlin, who also has SimAngus sons in this sale. Many dams are ET daughters from SL Red Angus and other dams were purchased from leading Red Angus programs across the country. The yearling Red Angus are registered with the American Simmental Association. The 2-year-olds are registered with American Red Angus.

Bull Buyer's Quick Guide to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org. Listed below are the units in which ASA EPDs are expressed:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See \$ Indexes for more details.)

Back Fat (BF): Inches of carcass backfat at 475 days.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight at 475 days.

Docility (DOC): Percent of offspring receiving a disposition score of 1 (docile).

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit: www.simmental.org

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Carcass marbling score at 475 days.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of carcass ribeye at 475 days.

Stayability (STAY): Percent of daughters remaining in the cowherd at six years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See TI for more details.)

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a rib-eye steak.

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Carcass yield grade score at 475 days.
